

Dear Sverigesdemokrater,

I am writing to you in English although I understand Swedish.

In some countries they have sprayed with aluminum-oxide since the 1960's from air crafts in order to destroy the pineal gland (pinealkirteln, talkottkörteln). It is basically because we do not have a need for it to stand in a production line. If you are not familiar with it, there are books to read about pineal gland.

It was mostly in the USA they put a few metals in the sky, which slowly reached the bottom. You could not see it, so you would breath it in and the aluminum-oxide would then go into your blood. Today they are doing it in the western world very intensively. But it is not only aluminum-oxide, but countless other stoffs.

**Geoengineering Aerosol:
Elements/Fibers/Particulates**

- Aluminum Oxide Particles
- Arsenic
- Bacilli and Molds
- Barium Salts
- Barium Titanates
- Cadmium
- Calcium
- Carbon Black/Black Carbon
- Chaff
- Chromium
- Coal Fly Ash (CFA)
- Desiccated Human Red Blood Cells
- Ethylene Dibromide
- Enterobacter Cloacal
- Enterobacteriaceae
- Graphene
- Human white Blood Cells-A (restrictor enzyme used in research labs to snip and combine DNA)
- Iron Oxides
- Lead
- Mercury
- Methyl Aluminum
- Mold Spores
- Manganese
- Mycoplasma
- Nano-Aluminum-Coated Fiberglass
- Nanotubes - Aluminum and Foreign
- Nitrogen Trifluoride
- Nickel
- Polymer Fibers
- Pseudomonas Aeruginosa
- Pseudomonas Florescens
- Pseudomonas Syringae/FROSTBAN
- Radio Active Thorium/Selenium
- Serratia Marcescens Sharp Titanium Shards
- Silver
- Streptomyces
- Strontium
- Sulfuric Acid
- Sulfur Dioxide
- Carbonyl Sulfide
- Sub-Micron Particles (Live Biological Matter)
- Sulfur Hexafluoride
- Unidentified Bacteria
- Uranium
- Yellow Fungal Mycotoxins
- Morgellion's Fibers

If somebody knows the pilots names, then arrest them.

If somebody knows the installments names, then arrest them.

The last two years they have put nano-robots as part of the spray. How the nano-robots work is best learned from Ana Maria Mihalcea, PhD MD on <https://anamihalceamdphd.substack.com/> or just see the film "N A N O T E R R O R : VAX, SMART DUST & DEPOP" <https://rumble.com/v52ly2f-n-a-n-o-t-e-r-r-o-r-vax-smart-dust-and-depop-dr.-ana-mihalcea.html>

Meanwhile you can take vitamin C or be more effective and order mecamenter in the USA for getting away with these metals, most of them.

For ordering MaserPeace and MasterRestore: masterpeacebyhcs.com

It costs around \$130.

In order for you to know the chemical trail, chem-trails, from frozen water vapor, there is one simple rule: chem-trail take one minute to several days, whereas water vapor is only visible around 10 seconds.

This picture is in the south of Sweden and I could see it one hour after. It could be a cargo plane as it did not make zig-zag over the sky. They can also mix the fuel with metals or they can fill several tanks with chemicals and spray it through injectors on the wings.

Why are they doing thing like this?

It is planely simple, the Swedish state or the military is paying the pilots very good and saying that they should keep it for them selves.

Yours sincerely

Carl Johan Friis-Hansen, Eng. E.
