

Dear SD,

1) I would prefer an answer that dives into whether you are primary under the government or at the side of the people.

2) I would like you to answer the on going chem-trails if you are against them or for them.

Chem-trail started in the U.S.A. in the 1950's, but in Sweden in 2024 it has gone mad with polluting the sky with chem-trails. Apart from using a lot of kr, you are making the plants, animals and people a much shorter life.

Have you not wondered why we have all got nanorobots, various micro-metals and nano-metals? Please see for example anamihalcea.substack.com as most are free.

We do not know how many multiplying nanorobots the blood can take as they are taking the life out of the red cells. The red cells are used to transfer oxygen. The nanorobots could come from the BIO-weapon "vaccinated" people by close contact or by air, but it may also more likely come from airplanes as hamster and the likes are having nanorobots, metals and uranium.

In most of Europe they pollute with chem-trails, so the question is why.

Carl J. Friis-Hansen
Electrical Engineer

Clouds on a clean sky.

Chem-trails on a pollutants sky with many metals.
