

## While you think of order, you forget what the evil Mafia (government, military, law, police) is doing to us.

The IQ has fallen 9 points in general in the Western world since 2020 and 2024. It is a drastic fall and has something to do with the BIO-weapon “vaccination”, the chem-trails and the food. Some have lost more brain and some have left unchanged. But more about this later.

From March 2020 until 2023 we investigated chem-trails, BIO-weapon, weather engineering and CBDC, all things that were common to all people on the planet. For people with interest they might read about U.S. Inc. election, Israel war and Ukrainian war.

The awoken of us were totally in agreement that BIO-weapon was the worse thing that could happen to us humans.

In 2022 to 2023 many scientists began to link BIO-weapon with RF (radio frequency), not least 5G-weapon. Apart from making some of us ill through history, the RF worked with the nano-robots and chemicals in our blood.

Most of us are in contact with other people and because of that, we are beginning to share the chemicals in the BIO-weapon, but not all because the top of Mafia says that everyone must get “vaccinated”. So there are probably some stuffs that can only come in the body through BIO-weapon.

Both men and women are getting difficulties making babies since the 1970's, but in particular since the 2021. In the 1970's it was due to RF and food. From the 2021 it was also due to the BIO-weapon. The scientists say that around 2030's it will virtually be impossible for people to get children, unless they manage to avoid the Mafia and their control to exterminate the people slowly.

There are very important rules when handling BIO-weapon “vaccine” on the factories. They operate with tight suits and air hose from the outside. The people on the BIO-weapon factory is **not** injected with BIO-weapon. They produced BIO-weapon from 2015 mostly in Ukraine. That is why the US Inc took over the government of Ukraine in 2014. The BIO-weapon are now bombed by Russia and “medical” factories are popping up in Africa.

The 2024's are seeing somewhat a relaxation in particular with nano-robots that became seen by a decade ago in only a few persons. But today they are seen billion wise in almost every person to a variegating degree. Even though pictures and videos are recorded, they ignore it. They are about 10 to 50 nm and lights in different color depending of their task. They are most likely breathed in via the air or transferred through contact with the BIO-weapon injected.

We have no idea what the nano-robots function are overall, but we can see some of the things:

- 1: All speeds are common, even extremely fast speeds (thousands of a second).
- 2: The various colors serves a certain task.
- 3: One task is to produce mesogen. A measuring device with wireless output.
- 4: Making antennas in different length.
- 5: Making something with the brain.
- 6: Seems to be controlled by the Internet, but not sure.

The mesogen appears to work, even though persons have been put to grave 9 month earlier and the ID-mark is working to be seen on the special Bluetooth application on the computer.

You can test it yourselves by installing “Bluetooth BLE Device Finder” and keep an eye on “Unknown name, ...”. It is always showing this text because the Bluetooth MAC address is not a known product.

Granted, there is little you can do except never take medicine and wash the chemicals away with for example “MasterPeace” and “MasterRestore” or something similar. The “MasterPeace” is a liquid which you take under the tongue for a little while once a day for a month. Do it at least every half year.

But being not part of Mafia we can do something that might kill the Mafia:

- 1: When you see an airplane spreading chemicals high up in the sky, write a letter, email or phone to the Mafia. For a letter and email you need a photo with the plane and a tail longer than 10 seconds.
- 2: When you see food containing something that is not announced, write a letter, email or phone the Mafia. For a letter or email you need a photo of the label and description of the additives that are not labeled.
- 3: When you see money disappear from the bank, write a letter to the bank anonymously. Please do not include any specific sender address, full names or anything that can locate you. The bank is higher than the Mafia and you need them to get along until now. If this was before 1975, it would be to say either you bank behave or I will leave you. But since we get our salary and pension from the banks after 1975, we have to send letter anonymously.
- 4: If you cannot say goodbye to the RF, then at least do the following: all computers wired connection, it is simpler and faster. Get a fiber connection instead of WiFi, it is simpler and faster.
- 5: Under all circumstances do not give your children mobile phones and switch WiFi and Bluetooth off. The head is much thinner and the RF is 10 times as violent. Bluetooth in your ears are very bad, use a mobile phone connected with a wire and make sure all RF (WiFi, Bluetooth) are switched off.

Apart from saving your selves with RF, you make it more difficult to rely on CBDC and social punishment.

The RF is approximately 1,000,000,000,000,000 times greater than natural RF 200 years ago. Even 30 years ago it was more moderate. 2024 or 2025 they will open up for 5G-weapen 60 GHz WiFi. **The 60 GHz is maybe very dangerous to humans and animals in that 60 GHz is the frequency that will hinder them getting oxygen, they will most likely die.** Every IoT (Internet of Things) are supposed to use 60 GHz to SMART meter. It is not the same as microwave oven, WiFi and Bluetooth which operate from 2.4, 2.45, 5 and 6 GHz. The 6 GHz is so called 5G.

The Mafia is spraying aluminum oxide and many other stuffs in the sky. The stuff is falling to the ground and are poisoning the people and animals blood and the plants. Some of the ingredients are highly toxic and will stay so for many 1000 years.

I am beginning to understand why a few people have a safeguard very deep under the Earth. Some are building bungalows a bit under the Earth but there are cathedrals 3 or more km under the Earth. They are empty but filled with food and lemonade, really a lot, I would guess to support a whole state a year.

The deep underground tunnels are linked by hundred of miles using extremely fast trains not only in US Inc but all over USA and some og Europe. They are regularly driving trucks down in some entrances in the side of a mountain delivering food and lemonade.

Is the not so well known tunnels for the very rich people above the Mafia? We are not sure. We are not sure what techniques they are using for tunnel digging. A girl who survived the deep tunnels explain that many tunnels has dead end or are going in ring, so you will die of thirst before you can escape.

In major towns in USA people are dying or not in good health. In 1983 I stayed a month in Oakland in California. It was clean, people living in their houses or taking Sunbath on their lawn. I lived by my aunt and she invited my cousin over, maybe so we could get married. I met a Danish girl also around 20 years old, who invited me to Sant Hans Evening. We were aruond 50 to burn witches on big fire down at the beach. Police came and looked at us and left again. It was peace and lovely.

Try to look at a big town in 2024:

**Their home town**

It was very difficult for the Mafia to implement the Fourth Reich before 1975. We got a small test in 1975 where power fell out in the southern Sweden and the whole of Denmark lasting two days. A high voltage cable got longer, because of high current, and hit a tree and a safety switch broke the connection. The other lines were overloaded and switched off. Within a few minutes the southern Sweden was dark just before Christmas Evening. Because Copenhagen used Swedish current, the network fell out from east toward west of Denmark. The Germans managed in the last second to avoid blackout through Europe.

We managed after two days to get the old diesel engine on on H.C. Ørstedværket to start by compressed air. If it didn't succeed, we would have to wait one more day in order to build up the pressure in the bottles. Then they had a stable frequency to start the coal fired and other power stations one by one.

It was two days without electricity, so how did the Swedish and the Danes "survive"? I was living north of Copenhagen and sometimes in Copenhagen. We had candle lights to read by and water began to run out the next day, so we would do fine without. Our cars brought us through the dark streets at night. The biggest problem was in Copenhagen, because some people could not find out that the painting and signs in the street determined who could drive. We all had cash money and most shops managed to write down on a piece of paper a receipt.

How would the same situation work out today 2024?

Even for two days the problem would be tremendous.

Shops would stay closed.

Many percent of battery cars would not be driving any longer.

Battery radios are seldom, so people would know what was happening.

Telephones, POTS, doesn't exist any longer, so people could not phone.

Farms are mostly today without reserve electricity, so pigs and chickens suffer.

Taxis are without emergency power with the headquarter radio, and customers not ring

Wired Internet would not work along side with WiFi and mobile phone.

Two days are still no real problem, but can you imagine just one month?

No water in the city, no food in the city, no cash and CBDC at all. No cars, buses and trucks, they have used their last petrol, diesel, gas and electricity. The only transport left is bicycle and horse.

## **The way forward if electricity is gone for over a year, HEMP High altitude Electric Magnetic Pulse.**

People must know what is happening at a very early stage. The earliest and best information is coming from radio armatures, HAM. There are many of them over the whole world and they all have good behavior. The radio armatures can then go to church or similar and put up a message saying what is going on.

We need to drive water to the town using horses. We also need some people making rims between the horses and the 4 wheeled water tanker.

We need food in the cities and even here the horses are number one. We need light trucks that two horses can pull.

We need to deliver water and food people that are limited in their movements.

Even though some people are helping each other, only 25% percent will survive. Even the Mafia will miss a lot of friends during the year. There is somewhat more hope for the people living in the countryside. They have easier access to water, food and small electricity with water turbines and eventually very small units provided by solar power and wind power.

You might not have more than a fortnight to get water to the towns. Otherwise some people will migrate out of town and see if it is possible to find a grained well or a river. The migrants will invade the countrymen and kill them if they are not capable of defending them.

During the time wells are grained all over, it will make water supply much easier. Food can after about a year happen in the way of the market place where people can get potatoes, salad, hens and much more.

All sorts of iron things should be up and running in a year. Okay, not complicated things, but simple things so advanced tools are unnecessary.

People need entertainment and good time in nature. Every body in church every Sunday, both to listen to the priest, talk to each other and here what other people are doing. Go out dancing, visit a theater and play chess in a club. Walk in the forest, bathe in the sea and ride out on a Saturday. Read book and mend some socks.

Use coal for heating or firewood.

Coal is plenty for the first year from coal fired power stations. Firewood may be a bit scarce, but if plenty at your location, harvest 25 m<sup>3</sup> wood. It gives warmth twice. Coal is also needed for blacksmith work.

We need to figure out something with money.

As we are a somewhat industrialist nation, we need money. It could be silver and gold coins in a couple of different sizes. Pensioners and limited people would need money paid by grown ups. The basic things we all need is water and food, so it is not a lot of money, very little. Every grownup have a little bit to do every weekday. It is majorly “real work” like farmer, blacksmith, carpenter, transport, et cetera. There is “service work” like teacher, doctor, nurse, priest, policeman, fire-brigade, et cetera.

Who is missing the banks, central government and the military?

## **What are the likelihood the top over the Mafia will kill you?**

Force the melting of spend fuel-rod by losing the power-grid with a HEMP.

Kill all animals by openen 5G-weapon on full power at WiFi 60 GHz

Do help the people to manage the environment.

These are a few angels to look at.

That the Mafia and the persons over them are going to help you take care of the Earth is a little difficult to believe in. They would not pollute air with metallic particle using flying machines and tanks in them. The air was much cleaner in the 1950's with either blue sky, partly lam clouds or overcast, and a seldom event thunder. You could look at the thermometer and see the four kinds of weather. Today the barometer is not telling you anything, so the air pressure is not mentioned so often. Various clouds in different layers very suddenly at the same time. Some "clouds" with frequency pattern as with GW radio transmitters towards the sky (military).

Kill all food and make artificial rubber that taste good, but are very unhealthy. Critters also served, which many people cannot eat. We have no idea why this is so modern, possibly because of repetition in TV, adds, radio and Internet.

There are countless examples of Mafia being the enemy af the population. The Mafia will also later be in the death zone, they are just earning their money and partly indoctrinated by direct energy and by TV.

We are hoping for President Donald Trump to save us, but he is a clever Zionist signing BIO-weapon "vaccine" in Autumn 2019. We are hoping that Dr. Reiner Füllmich will save us, but he is in maximum prison for a mister minor and has no charge. We are hoping for governments to decline the weapon toward us, but they are going strong and sinister with the Mafia.

The Mafia is working with the many rules of the many 3 letters abrivations which are controlled by the few, very few. My stepfather was a clinical psychopath, but with some good stuff in him. He was the one, together with Croyer, who warned the governments about making small particles that goes into lungs and the skin. Now they are all doing it.

The U.S. Inc. (US) is a state belonging to the atican and The City Of London.

The U.S.A. (USA) the miles of land from the east to the west belonging to the people.

Denmark, Kingdom Of is virtually the whole Denmark belong to the thrown, the government, the law, military and police. The Denmark, Kingdom Of is supposed to deliver calculation to the US, but has not done so the last 10 years?

Sweden, Kingdom Of is virtually the same history. If they are repporting to the US is unknown.

I tried to wite a letter to the now king of Denmark. Received a reply back of "thank you" and nothing else. The letter can be seen:

[https://carl-fh.com/images/doc\\_dk/Deres\\_Kongelige\\_H%C3%B8jhed\\_Kronprins\\_Frederik.pdf](https://carl-fh.com/images/doc_dk/Deres_Kongelige_H%C3%B8jhed_Kronprins_Frederik.pdf)

Top over the Mafia has had over a 100 years to develop a master plan. We know for a near fact that they want to kill us. We know for a fact that the 3 letter abbreviations have spend the last 30 years doing fine graphs and laws/dictates that is slowly being seen. We know that relative few people knows what is going on and for the most of it follow the directives of war, medicine pills, voting, et cetera. The to over the Mafia is not known and we see almost no pictures of them.

## **Nuclear disaster, HEMP, on the whole world or part of the world?**

There is a chance, not a minor, that will happen. Russia has a rocket that carries a HEMP that virtually can't be shut down. It is just one single press of a button and for example USA gets it on top of the atmosphere. The USA or US Inc has the same weapon although on a slower rocket. China may also have a HEMP. **So lets say that the Russians feel that US is making a disaster, Russia will press the HEMP button.** One second after the explosion all electronic equipment in most of USA will not work. Radios, TV's, computers, mobile phones, hart electronics, electromotors, transformers, electric toothbrush, nearly all cars, buses, trains, air plans falling from the sky, most ships stop, ... **We will live a life compared to 200 years ago in most of the USA.** Only a few number of people will die, may be 10 or 20%, the rest will just have no eletricity, absolutely none.

There is a chance that a new generator will be flown in to cool the uranium. The fuel tanks would be okay, so trucks from neighboring countries may help filling the tanks again and again. But if this doesn't work the USA will be seriously contaminated so in the end no animals can live there, except scorpion and a few other animals. Remember there are many nuclear power stations and they all use up the fuel, so that there is only 90% of useful uranium left. We could have avoided this scenario by running thorium, but it was closed in 1973 because it was difficult to make plutonium for the military.

It might go relative fast to the Mafia up and from imported generators, lamps, chargers for the satellite phones, imported pumps to gain water height, imported computers with government material, imported printing machines, imported food, ... So the US Inc will manage because of their authority and all the money (gold). This is until they cannot keep USA away, they will kill them, or breathing will be toxic.

It is very different with the USA. I am sorry to say that the cities will likely kill each other for no reason. Those in the countryside have a much better chance. Import a generator and run the pump deep under ground, it most likely function. There is plenty af food, people can come and collect I themselves on horse or bicycle. ... Except if air becomes toxic!

## **5G-weapon & BIO-weapon on nearly the whole world?**

We are now looking at most plausible outcome.

5G-weapon turned up 2020 and are nearly fulfilled now. Some mobile phones play to incorporate 5G-weapon, but it is only 1 GHz over the usual 5 GHz WiFi. The problem is the AI controlled 60 GHz, the oxygen limiter for the blood. The Mafia says that it is important all the common people get BIO-weapon “vaccine” for us to really die. But not “vaccinated” are also having metal, so the question is if 5G-weapon can kill the non “vaccinated”?

According Todd Calender 5G-weapon + BIO-weapon will kill everybody if we had taken it all.

[Warfare Against Humanity - Conversation With Weapons Expert Mark Steele](#)

Switch off as many as you feel comfortable to handle. Paint them, saw them down, put signs up “weapon” and write about 5G-weapon, ULEZ-weapon and other weapons.

The more people know about the Mafia killing us, the better.

## **Be yourself, have an own opinion and enjoy the nature.**

It can take a few more years to have the Mafia give up their plan and let the people decide for themselves according the country or region they are living in.

There will come hard times, but if we win the reward will be the best for 6.000 years. It is a very exiting time to live in that WWI and WWII only touched.

Yours sincerely

2024-07-23 *Carl J. Friis-Hansen*
